- The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income. Account 281 is not allocated. The calculations of ADIT in the annual true-up calculation will use the 13 month average balances for non-plant related items and the prorated end-of-year balances for plant related items. The calculation of ADIT in the annual Prue-Up calculations will be performed in accordance with IRS regulation Section 1.167(1)-1(h)(6). Work papers supporting the ADIT calculations will be posted with each Annual True-Up for a given year will use the same methodology that was used to project that year's rates. The proration of the Annual True-Up shall apply beginning with the 2019 Annual True-Up.
- C Identified in Form 1 as being only transmission related.
- D Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 14, column 5 minus amortization of Regulatory Asset at page 3, line 11, column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported on pages 111, line 57 in the Form 1.
- E Page 3, Line 6 EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, and non-safety related advertising included in Account 930.1 found at 323.191.b. Page 3, Line 7-Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h.
- F Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- The currently effective income tax rate, where FIT is the weighted average Federal income tax rate; SIT is the weighted average State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes." If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 26). Excess Deferred Income Taxes reduce income tax expense by the amount of the expense multiplied by (1/1-T).

Inputs Required:	FIT =	21.00%	(Federal Income Tax Rate)
	SIT=	6.00%	(Weighted Average State Income Tax Rate or Composite SIT)
	n =	0.00%	(nercent of federal income tax deductible for state nurnoses)

- H Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).
- Removes dollar amount of transmission plant to be included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- J Enter dollar amounts
- K ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC.
- L Page 4, Line 28 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1.
- M Includes income related only to transmission facilities, such as pole attachments, rentals and special use.
- N Company will not have any grandfathered agreements. Therefore, this line shall remain zero.
- The revenues credited on page 1 lines 2-6 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. Revenue Credits do not include revenues associated with FERC annual charges, gross receipts taxes,-facilities not included in this template (e.g., direct assignment facilities and GSUs) the costs of which are not recovered under this Rate Formula Template.
- P Reserved
- Q Prior to obtaining long term debt, the cost of debt, will be 1.99%. If SCMCN obtains project financing, the long term debt rate will be determined using the methodology in Attachment 8 and Attachment 8 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. Once SCMCN has long term debt, SCMCN will use its actual cost of long term debt determined in Attachment 5. The capital structure will be 60% equity and 40% debt during the construction period, after any asset is placed in service, it will be based on the actual capital structure but capital at 60% equity.
- R Calculate using 13 month average balance, except ADIT which is calculated based on the prorated end of year balances as required by Section 1.167(l)-1(h)(6) of the IRS regulations for purposes of rate projections. An annual true-up is calculated based on an average of the actual beginning of the year and end of the year balances for non-plant related ADIT and prorated end of year balances for plant related ADIT.
- S Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Utility must receive FERC authorization before recovering the cost of abandoned plant.
- T Recovery of Regulatory Assets is permitted only for pre-commercial and formation expenses as authorized by the Commission. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.
- U Excludes Asset Retirement Obligation balances
- V Company shall be allowed recovery of costs related to interest rate locks. Absent a Section 205 filing, Company shall not include in the Formula Rate, the gains, losses, or costs related to other hedges.
- W The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference
- X Calculate using a simple average of beginning of year and end of year balances reconciling to FERC Form No. 1 by Page, Line and Column as shown in Column 2.

To be completed in conjunction with Attachment H.

Annual Totals

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
 Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable.
- Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This VLDA, it applications.

 Gross Plant is the total capital investments required to maintain the facilities to their original capabilities.

 Gross Plant does not include Unamortized Abandoned Plant.

 Project New Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes any regulatory asset, which are to entered as a separate line item.

 Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 16. Project Depreciation Expense includes the amortization of Abandoned Plant

 Trac-Up Adjastment is calculated on the Project Trace-Up Adj

- True-Up Adjustment is calculated on the Project True-up Schedule for the Rate Year
 The Net Ree Reg is the value to be used in the SPFs rate calculation under the applicable Schedule under the SPF OATT for each project.
 The Total General, Intangable and Common Depocation Expense excludes any depreciation expense directly associated with a project and thereby included in page 2 column 9.
 The Unamortized Abandoned Plant balance is included in Net Plant, and Amortization of Abandoned Plant is included in Depreciation Expense.
 The discount is the reduction in revenue, if any, that the company agreed to, for instance, to be selected to build facilities as the result of a competitive process and equals the amount by which the annual revenue requirement is reduced from the ceiling rate

- Reduction in the reduction in revenue, it any, that the Company agreed to, nor instance, not escreed to busin inclinates as the result of a Company representation in revenue, it and the requirements are requirements. For example, the results of t

24	Income Tax (Attach. H, pa	ge 3 line 44 col 5)							220,960.38
		thout 100 basis point increase in ROE							209,339.62
		me Taxes for 100 basis point increase in RO	OE .						11,620.77
	Rate Base (line 1)								################
28	Incremental Return and Inco	me Taxes for 100 basis point increase in Ro	OE divided by Rate Base						(0.0685)

Notes:

- A Line 5 includes a 100 basis point increase in ROE that is used only to determine the increase in return and income taxes associated with a 100 basis point increase in ROE. Any actual ROE incentive must be approved by the Commission. For example, if the Commission were to grant a 137 basis point ROE incentive, the increase in return and taxes for a 100 basis point increase in ROE would be multiplied by 1.37 on Attachment 1 column 12.
- B The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference

4	Total Annual Revenue Requirements (Note A	.)	-	-	-	-	-		-	-
						Monthly Interest Rate			-	

Notes:

- 1) From Attachment 1, line 15, col. 14 for the projection for the Rate Year.
- 2) From Attachment 1, line 15, col. 14 for that project based on the actual costs for the Rate Year.
- 3) The "Revenue Received" on line 2, Col. (E), is the total amount of revenue distributed to company in the year as shown on pages 328-330 of the Form No 1. The Revenue Received is input on line 2, Col. E excludes any True-Up revenues. Column E, lines 3 are the dollar amounts of Revenue Received reflecting the % in Column D. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Net Revenue Requirement in Column C.
- Interest from Attachment 6.
- 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

Prior Period Adjustment

	(a)	(b)	(c)	(d)
	Prior Period Adjustment	Amount	Interest	Total
	(Note B)	In Dollars	Note B	Col. (b) + Col. (c)
5	-	-	-	-

Notes:

Α

В

For each project or Attachment H, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H and any Projects paid by SPP to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col. (G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).

Interest Income (Expense)

Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.

30e									
30f			=	-				=	
31		Total						_	

Notes:

- A Recovery of regulatory asset is limited to any regulatory assets authorized by FERC.
- B Recovery of abandoned plant is limited to any abandoned plant recovery authorized by FERC.
- C Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance ineligible for inclusion in rate base; and (iii) a demonstration that AFUDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1.
- D For rate projections and the annual true-up, ADIT is computed using the prorated end of the year balances as required by Section 1.167(1)-1(h)(6) of the IRS regulations. Attachment 4a calculates the projected ADIT balances on line 28 above based on the prorated ending ADIT balances as calculated on Attachment 4b. For the annual true-up, Attachment 4c calculates the projected ADIT balances on line 28 above based on the prorated ending ADIT balances as calculated on Attachment 4f.
- E Recovery of a Regulatory Asset is permitted only for pre-commercial and formation expenses, and is subject to FERC approval before the amortization of the Regulatory Asset can be included in rates. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.
- F Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.
- G The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account. Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account.
- H Calculate using 13 month average balance, except ADIT which is calculated as described in Note D.

Note 1
Uses a 365 day calendar year.

Note 2
Projected end of year ADIT must be based on solely on enacted tax law. No assumptions for future estimated changes in tax law may be forecasted.

A Substantial portion, if not all, of the ADIT-282 balance is subject to proration. Explanation must be provided for any portion of balance not subject to proration.

B Only amounts in ADIT-190 related to NOL carryforwards, if applicable, are subject to proration. See Line 44 in Attach 4c and 4d.

C Only amounts in ADIT-190 related to NOL carryforwards, if applicable, are subject to proration. See Line 18 in Attach 4c and 4d.

Attachment 4c - Accumulated Deferred Income Taxes (ADIT) Worksheet (Beginning of Year) For the 12 Months Ended 12/31/2022 GridLiance High Plains LLC

Transmission

Ln	Item	Related	Plant Related	Labor Related	
1 ADIT-282		(82,740)	-	- Line 30	
2 ADIT-283		-	-	- Line 44	
3 ADIT-190		-	-	- Line 18	
4 Subtotal		(82,740)	-	- Sum of Lines 1-4	

In filling out this attachment, a full and complete description of each item and justification for the allocation to Columns B-F and each separate ADIT item will be listed. Dissimilar items with amounts exceeding \$100,000 will be listed separately.

Note B
Interest is calculated by taking the interest rate in line 8 and applying it monthly to the balances in Column C-N (i.e., for January 12/12* Column O, February 11/12* Column O, etc.)
plus the interest rate in line 8 times 1.5 times the sum of the balances for January through December. Multiplying the monthly balances times the interest rate provides the interest in the year of the over or under collection and adding the interest rate in line 8 times 1.5 times the sum of the the balances for January through December provides the interest for the balance of the 24 month period

4	Cost per labor dollar (line2 / line3)	-	-	-	-	-	
5	labor expensed (labor not capitalized) by SCMCN in current year, 354.28.b.	-	-	-	-	-	
6	PBOP Expense for current year	-	-	-	-	-	-
7	Lines 2-3 cannot change absent approval or acceptance by FERC in a separate proceeding.						
8	PBOP amount included in Company's O&M and A&G expenses included in FERC Account Nos. 500-935						-

Note Letter

There will be zero PBOP expenses in the SCMCN rates until SCMCN files for recovery of its PBOP expenses. Line 8 removes all SCMCN or affiliate BPOP expenses in FERC Accounts 500-935.

Attachment 8 Financing Costs for Long Term Debt using the Internal Rate of Return Methodology GridLiance High Plains LLC

To be utilized until a project is placed in service
Consistent with GAAP, the Origination Fees and Commitments Fees will be amortized using the standard Internal Rate of Return formula below.
Each year, the amounts withdrawn, the interest paid in the year, Origination Fees, Commitments Fees, and total loan amount will be updated on this attachment.

Table 1 Total Loan Amount aternal Rate of Return (Note 1)
ased on following Financial Formula (Note 2): $\sum_{i=0}^{N} C_i / (1 + IRR) pwr(t)$

- 1 The IRR is the input to Debt Cost shown on Attachment H, Page 4, Line 20 during the construction period, after obtaining project financing, in accordance with Note Q of Attachment H.
- 2. The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation is shown on line 6.

- The lack is a discount rate that makes the net prese. N is the last quarter the loan would be outstanding t is each quarter. Ct is the cash flow (Table 5, Col. I in each quarter)
- Ct is the cash flow (Table 5, Col. I in each quarter)
 Alternatively the equation can be written as 0 = C0 + C1/(1+IRR) + C2/(1+IRR)2 + C3/(1+IRR)3 + ... + Cn/(1+IRR)n and solved for IRR
 The Excel TM formula on line 2 is : (round(XIRR(first quarter of loan Col A of Table 5: last quarter of loan Col I of Table 5: last quarter of loan Col I of Table 5; first quarter of loan Col I of Table 5: last quarter of loan Col I of Table 5; last quarter o
- once the actual fees are known.
- once the actual rees are known.

 The estimate of the average 3 month Libor forward rate for the year on line 23 is that published by Bloomberg Finance L.P. during August of the prior year and is trued-up to actual average 3 month Libor rate for the year under the loan.

 Table 5, Col. C reflect the capital expenditures in each quarter

 Table 5, Col. D reflect the amount of the loan that is drawn down in the quarter

- 8. Table 5, Col. E is the amount of principle drawn down
 9. Table 5, Col F calculates the interest on the principle drawn down to date based on the applicable interest on line 25
 10. Table 5, Col G is the total origination fees in line 16 and is input in the first quarter that a portion of the loan in drawn
- 11. Table 5, Col. H is calculated as follows:
- 11. Table 5, Col. H is calculated as follows:

 A x (line 21, Col. (b)/4) + sum of line 17, Col. (c) through line 21x, Col. (c)

 Where A = Loan amount in line 1 less the amount drawn down (Table 5, Col. (E)) in the prior quarter

 12. The inputs shall be estimated based on the current market conditions and is subject to true up for all inputs, e.g., fees, interest rates, spread, and Table 3 once the
- 13. Prior to obtaining long term debt, the cost of debt, will be 1.99%. If SCMCN obtains project financing, the long term debt rate will be determined using the methodology in Attachment 8 and Attachment 8 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. Once SCMCN has long term debt, SCMCN will use its actual cost of long term debt determined in Attachment 5. The capital structure will be 60% equity and 40% debt during the construction period, after any asset is placed in service, it will be based on the actual capital structure.

Attachment 11 Wholesale Distribution Service GridLiance High Plains LLC

To be completed in conjunction with Attachment H.

Pages 1-2 are to be filed out if the facilities providing Wholesale Distribution Service are booked to transmission. If the facilities are booked to Distribution, see pages 3-6

The Wholesale Distribution Revenue Requirement is projected using either pages 1-2 or 4-6. The same pages are populated with actual data and the difference with interest is calculated on Attachment 12 Notes A-H refer to the notes at the bottom of page 2 of 6 of this Attachment

Attachment H Line Page, Line, Col. 16 Annual Totals

Note Letter

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
- Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable.
- C Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Gross plant does not include Unamortized Abandoned Plant.
- D Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes any regulatory asset, which are to entered as a separate line item.
- E Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 16. Project Depreciation Expense includes the amortization of Abandoned Plant
- F The Total General, Intangible and Common Depreciation Expense excludes any depreciation expense directly associated with a project and thereby included in page 2 column 9.
- G The Unamortized Abandoned Plant balance is included in Net Plant, and Amortization of Abandoned Plant is included in Depreciation/Amortization Expense.
- H The Use % is the customers NCP load divided by all of the NCP loads on the facilities
- If a portion of the projects revenue requirement is assessed to more than one customer, the project will be entered in a row for each customer seperately, such that the total of the revenue requirements for each customer equals the revenue requirement for that project.

A The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost account has recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account.

B Calculate using 13 month average balance, except ADIT which is calculated based on the average of the beginning balance and a prorated end of year balance as required by Section 1.167(l)-1(b)(6)(ii) of the IRS regulations for purposes of rate projections. An annual true-up is calculated based on an average of the actual beginning of the year and end of the year balances.

Notes:

- 1) From Attachment 11, page 2, line 15, col. 11 and Attachment 11a, page 3, col. 11 for the projection for the Rate Year.
- 2) From Attachment 11, page 2, line 15, col. 11 and Attachment 11a, page 3, col. 11 for that project based on the actual costs for the Rate Year.
- 3) The "Revenue Received" on line 2, Col. (E), is the total amount of revenue distributed to company for Wholesale Distribution service. The Revenue Received is input on line 2, Col. E excludes any True-Up revenues.

 Column E, lines 3 are the dollar amounts of Revenue Received reflecting the % in Column D. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Net Revenue Requirement in Colum 4) Interest from Attachment 6.
- 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

Notes: A

For each project or Attachment 11 or 11a, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment 11 and 11a and any Wholesale Distribution service paid by SPP to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col.(G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).

Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.
