### **VIA ELECTRONIC FILING**

The Honorable Debbie-Anne A. Reese Secretary Federal Energy Regulatory Commission 888 First Street NE Washington, DC 20426

Re: GridLiance High Plains LLC, Docket No. ER25-\_\_\_\_\_

Annual Informational Filing of RY2025 Projected Net Wholesale

Distribution Revenue Requirement and RY2023 True-Up Adjustment

Dear Ms. Reese:

Pursuant to Section VI of GridLiance High Plains LLC's (GridLiance HP) Wholesale Distribution formula rate protocols (Protocols), GridLiance HP submits this transmittal letter and supporting materials (Informational Filing) reflecting GridLiance HP's projected net Wholesale Distribution revenue requirement (Annual Projection) for Rate Year (RY) 2025, effective January 1, 2025, which includes its Wholesale Distribution Annual True-Up Adjustment (True-Up) for RY2023. As set forth in the Protocols, this Informational Filing is provided to the Federal Energy Regulatory Commission (Commission or FERC) for informational purposes only and does not require any Commission action.<sup>1</sup>

#### I. BACKGROUND

GridLiance HP was formed specifically to develop, own, and operate transmission facilities within the Southwest Power Pool, Inc. (SPP) region. GridLiance HP and its sister transmission companies operating in other regional transmission organizations are subsidiaries of GridLiance Holdco, LLC (GridLiance). GridLiance's transmission-only (Transco) utility subsidiaries, like GridLiance HP, collaborate with electric cooperatives, municipal utilities, joint action agencies, and others to plan for the future of the grid, invest in necessary electric infrastructure and implement strategies to improve system reliability and resiliency and reduce overall costs to customers.

GridLiance HP also maintains a formula rate template and protocols for transmission rates pursuant to an Open Access Transmission Tariff (OATT), which was approved by the Commission in Docket No. ER18-1267. As explained in that proceeding, the facilities subject to the formula rate in GridLiance HP's OATT are the same as the facilities subject to the template for its Wholesale Distribution revenue requirement. Accordingly, this Informational Filing also demonstrates GridLiance HP's compliance with its Protocols for the formula rate template included in its OATT.

GridLiance HP currently owns approximately 444 miles of transmission lines and related facilities in the Oklahoma Panhandle region (Oklahoma Panhandle Assets) and a 65% interest in approximately 30 miles of transmission lines and related facilities in Kansas (Kansas Assets). GridLiance HP acquired certain of the Oklahoma Panhandle Assets from Tri-County Electric Cooperative, Inc. (TCEC) on April 1, 2016, pursuant to the Commission's authorization under Section 203 of the Federal Power Act (FPA) in Docket No. EC15-206-000. On December 10, 2015, in Docket No. ER16-505, GridLiance HP requested Commission acceptance of a Wholesale Distribution formula rate template and implementation protocols, Wholesale Distribution Service Agreement, and Wholesale Distribution Operating Agreement (WDS Rate) to enable GridLiance HP to recover the cost of providing wholesale distribution service over the Oklahoma Panhandle Assets to TCEC. On February 8, 2016 the Commission accepted GridLiance HP's WDS Rate, subject to the outcome of Docket No. ER15-2594.

Since the February 8, 2016 Order, the Commission has accepted revisions to GridLiance HP's WDS Rate to (1) implement the return on equity agreed to in an uncontested settlement approved by the Commission in Docket No. ER15-2594;<sup>6</sup> (2) implement a revised affiliate cost allocation methodology in compliance with the Commission's directive in Docket No. ER15-2594;<sup>7</sup> (3) revise GridLiance HP's methodology for calculating Accumulated Deferred Income Tax (ADIT) balances in its annual revenue requirement projections in compliance with guidance

GridLiance HP transferred functional control of the Kansas Assets to SPP on September 1, 2020. These assets are included in the concurrent Informational Filing GridLiance HP is submitting to provide background and information on its SPP transmission rates.

<sup>&</sup>lt;sup>3</sup> South Central MCN LLC, 154 FERC ¶ 61,174 (2016).

South Central MCN LLC, Docket No. ER16-505-000 (Dec. 10, 2015). As noted in the concurrent Informational Filing GridLiance HP is submitting for its SPP transmission rates, SPP later determined that, due to certain facility upgrades GridLiance HP completed to respond to TCEC's system reliability concerns, a portion of the Oklahoma Panhandle facilities satisfy Attachment AI. As of November 1, 2018, GridLiance HP transferred functional control to SPP, which used the Networked Oklahoma Panhandle Assets to provide transmission service to customers in Zone 11 under the SPP Tariff, and GridLiance HP submitted its annual information filings reflecting its ATRR for the 2019, 2020, and 2021 rate years, including the costs associated with the Networked Oklahoma Panhandle Assets. On September 22, 2022, the Commission issued Opinion No. 579 determining that SPP and GridLiance HP had not demonstrated that the proposed tariff revisions to incorporate the Networked Oklahoma Panhandle Assets and associated ATRR into Zone 11 are just and reasonable. Sw. Power Pool, Inc., 180 FERC ¶ 61,192, (2022). Furthermore, The Commission clarified that the Networked Oklahoma Panhandle Assets may continue to be classified as distribution facilities and GridLiance HP's wholesale distribution rate remains the rate on file with the Commission for recovery of the cost of service provided by the Networked Oklahoma Panhandle Assets as distribution facilities, effective November 1, 2018, and going forward. Sw. Power Pool, Inc., 182 FERC ¶ 61,014, (2023).

<sup>&</sup>lt;sup>5</sup> South Central MCN LLC, 154 FERC ¶ 61,090 (2016) (Feb. 8, 2016 Order).

<sup>&</sup>lt;sup>6</sup> South Central MCN LLC, Docket No. ER16-505-002 (Dec. 29, 2017) (delegated letter order).

<sup>&</sup>lt;sup>7</sup> South Central MCN LLC, 161 FERC ¶ 61,053 (2017) (Oct. 19, 2017 Order).

from the Internal Revenue Service (IRS) and the Commission;<sup>8</sup> (4) correct a technical error that would have resulted in GridLiance HP utilizing a hypothetical cost of debt rate, even after it acquired actual debt;<sup>9</sup> (5) revise GridLiance HP's methodology for calculating ADIT balances in its annual revenue requirement true-ups in compliance with guidance from the IRS and the Commission;<sup>10</sup> and (6) reflect in its formula rate templates and protocols GridLiance High Plains' name change from its previous name, South Central MCN LLC.<sup>11</sup>

On January 29, 2019, in Docket No. EL19-29-000, the Commission instituted a proceeding under Section 206 of the FPA to determine whether the inclusion of an income tax allowance in GridLiance HP's formula rate templates is just and reasonable, given that GridLiance HP is owned by a limited partnership and recovers a return on equity that was calculated using a discounted cash flow methodology. The Commission predicated the 206 proceeding on the case of *United Airlines, Inc. v. FERC*, 827 F.3d 122 (D.C. Cir. 2016) and FERC's Revised Policy Statement on Treatment of Income Taxes, issued on March 15, 2018. On December 19, 2019, in Docket No. ER19-2488, the Commission issued an order approving an uncontested settlement agreement that resolved the income tax allowance issue and directed GridLiance HP to revise its Formula Rate to effectuate certain conditions contained in the settlement agreement. On February 20, 2020 and April 29, 2020, GridLiance HP submitted compliance filings for its WDS Rate in Docket No. ER20-1047 to comply with its commitments in the settlement, which were accepted by the Commission, effective January 1, 2020 and July 1, 2020, respectively. 14.

On February 4, 2019, in Docket Nos. ER15-2594, ER17-953, and EL18-16, the Commission issued an order in which it granted GridLiance HP's request for rehearing and reversed a previous directive that would have required GridLiance HP to calculate the weighted marginal income tax rate of each category of its owners and fix that input in GridLiance HP's formula rate templates.<sup>15</sup> The Commission also accepted, subject to condition and further compliance filings, GridLiance HP's proposal to delete a section of its formula rate protocols

<sup>&</sup>lt;sup>9</sup> *Id.* 

<sup>&</sup>lt;sup>11</sup> *Id*.

<sup>13</sup> *Id. See also Inquiry Regarding the Commission's Policy for Recovery of Income Taxes*, Revised Policy Statement, 162 FERC ¶ 61,227 (2018).

<sup>&</sup>lt;sup>14</sup> GridLiance High Plains LLC, Docket Nos. ER20-1047-000 and ER20-1047-001 (Oct. 13, 2021) (delegated letter order).

<sup>&</sup>lt;sup>15</sup> South Central MCN LLC, 166 FERC ¶ 61,092 (2019).

that was the subject of the FPA Section 206 proceeding in Docket No. EL18-16-000 and terminated the Section 206 proceeding. On April 5, 2019, GridLiance HP submitted a compliance filing to comply with several directives from the Commission's February 4, 2019 order. On January 19, 2021, GridLiance HP submitted a supplemental compliance filing to address certain items raised in informal conversations with Commission staff. The compliance filings were accepted by the Commission, effective April 1, 2016 and April 1, 2018, for Docket Nos. ER17-953 and ER15-2594, respectively. 17

In November 2019, FERC issued a final rule on addressing the effects of the Tax Cuts and Jobs Act on accumulated deferred income taxes (ADIT). Order No. 864 required utilities with formula transmission rates to (1) include a mechanism by which excess ADIT is deducted from rate base and (2) incorporate a mechanism to adjust income tax allowance to reflect amortized excess ADIT and (3) add a new permanent worksheet that will annually track information related to excess ADIT in their formula rate, effective January 2020. On June 12, 2020, in Docket No. ER20-2043, Gridliance HP submitted a compliance filing to revise its WDS Rate to comply with the directives in Order No. 864. On December 21, 2022, GridLiance HP submitted a supplemental compliance filing, which was accepted by the Commission, effective January 27, 2020. <sup>18</sup>

### II. INFORMATIONAL FILING

Section VI.A of the GridLiance HP Protocols provides that, by March 15 of each year, GridLiance HP "shall submit to FERC an Informational Filing of their projected net revenue requirement for the Rate Year, including their Annual True-Up and True-Up Adjustment." Accordingly, attached herewith are populated formula rate templates, in Microsoft Excel format, calculating GridLiance HP's actual net Wholesale Distribution revenue requirement for the Rate Year 2023, and its projected net Wholesale Distribution revenue requirement for the Rate Year 2025, including the True-Up Adjustment.

In addition, Section VI.A of the Protocols requires the Informational Filing to include information related to affiliate cost allocation. GridLiance HP described its affiliate cost allocation methodology in a compliance filing GridLiance HP submitted to the Commission on February 9, 2017 in Docket Nos. ER15-2594-0003, ER16-505-000, and ER17-953,000. As described in that filing, GridLiance HP allocates affiliate costs by directly assigning direct costs incurred by it or its centralized service company, GridLiance Management, LLC (ManageCo), to GridLiance HP and its affiliate Transcos on whose behalf the direct costs were incurred, and

<sup>&</sup>lt;sup>16</sup> *Id*.

 $<sup>^{17}</sup>$   $\,$  GridLiance High Plains LLC, 175 FERC  $\P$  61,070 (2021).

<sup>&</sup>lt;sup>18</sup> GridLiance High Plains LLC, Docket Nos. ER20-2043-000 and ER20-2043-001 (Feb. 3, 2023) (delegated letter order).

South Central MCN LLC, Docket Nos. ER15-2594-003, ER16-505-000, ER17-953-000 (Unconsolidated) (Feb. 9, 2017).

allocates indirect costs incurred by ManageCo to GridLiance HP and its affiliate Transcos in proportion to their internal and external direct costs. <sup>20</sup> The Commission accepted GridLiance HP's proposed cost allocation methodology on October 19, 2017. <sup>21</sup> There has been no change in GridLiance HP's cost allocation methodology since GridLiance HP submitted its February 9, 2017 compliance filing. GridLiance HP's RY2025 Annual Projection does not include a specific breakout of costs between affiliates. Instead, using the cost allocation methodology described above, GridLiance HP projected in its budgeting for RY2025 the direct costs to be incurred by each affiliate, including GridLiance HP, and then, according to the cost allocation methodology, allocated projected indirect costs by the ratio of direct costs.

#### III. SERVICE

As required by Section VI of GridLiance HP's Protocols and to ensure that all Interested Parties receive proper notice of this Informational Filing, GridLiance HP will post this filing and its docket number on GridLiance HP's website within five (5) days of this submission. A copy of this filing is being provided to TCEC at the time of filing.

#### IV. CONTENTS OF FILING

In addition to this transmittal letter, this filing includes:

Exhibit A: populated Microsoft Excel formula rate template reflecting GridLiance HP's 2025 projected net Wholesale Distribution revenue requirement, effective January 1, 2025

Exhibit B: populated Microsoft Excel formula rate template reflecting GridLiance HP's Annual True-Up of its actual net Wholesale Distribution revenue requirement for the 2023 rate year

<sup>&</sup>lt;sup>20</sup> *Id.* at 3-4.

<sup>&</sup>lt;sup>21</sup> October 19, 2017 Order at PP 50-51.

### V. CONCLUSION

For the reasons discussed herein, GridLiance HP respectfully requests that the Commission accept this filing for informational purposes, consistent with Section VI of the GridLiance HP Protocols.

Respectfully submitted,

/s/ Travis M. Contratto

Formula Rate - Non-Levelized Rate Formula Template

Utilizing FERC Form 1 Data GridLiance High Plains LLC

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)

References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Note	
Letter	

#### A Reserved

- The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income. Account 281 is not allocated. The calculations of ADIT in the annual true-up calculation will use the 13 month average balances for non-plant related items and the prorated end-of-year balances for plant related items. The calculation of ADIT in the annual projection and Annual True-Up calculations will be performed in accordance with IRS regulation Section 1.167(l)-1(h)(6). Work papers supporting the ADIT calculations will be posted with each Annual True-Up and/or projected net revenue requirement and included in the annual Informational Filing submitted to the Commission. Beginning with the 2019 rate year, the Annual True-Up for a given year will use the same methodology that was used to project that year's rates. The proration of the Annual True-Up shall apply beginning with the 2019 Annual True-Up.
- C Identified in Form 1 as being only transmission related.
- D Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 14, column 5 minus amortization of Regulatory Asset at page 3, line 11, column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported on pages 111, line 57 in the Form 1.
- Page 3, Line 6 EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, and non-safety related advertising included in Account 930.1 found at 323.191.b. Page 3, Line 7-Regulatory Commission Expenses directly related to transmission service, ISO fillings, or transmission siting itemized at 351.h.
- F Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- The currently effective income tax rate, where FIT is the weighted average Federal income tax rate; SIT is the weighted average State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes." If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T). (page 3, line 26). Excess Deferred Income Taxes reduce income tax expense by the amount of the expense multiplied by (T/1-T).

Inputs Required: FIT = 21.00% (Federal Income Tax Rate)
SIT = 4.20% (Weighted Average State Income Tax Rate or Composite SIT)
p = 0.00% (percent of federal income tax deductible for state purposes)

- H Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).
- Removes dollar amount of transmission plant to be included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- J Enter dollar amounts
- K ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC.
- L Page 4, Line 28 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1.
- M Includes income related only to transmission facilities, such as pole attachments, rentals and special use.
- N Company will not have any grandfathered agreements. Therefore, this line shall remain zero.
- O The revenues credited on page 1 lines 2-6 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. Revenue Credits do not include revenues associated with FERC annual charges, gross receipts taxes, facilities not included in this template (e.g., direct assignment facilities and GSUs) the costs of which are not recovered under this Rate Formula Template.
- P Reserved
- Q Prior to obtaining long term debt, the cost of debt, will be 1.99%. If SCMCN obtains project financing, the long term debt rate will be determined using the methodology in Attachment 8 and Attachment 8 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. Once SCMCN has long term debt, SCMCN will use its actual cost of long term debt determined in Attachment 5. The capital structure will be 60% equity and 40% debt during the construction period, after any asset is placed in service, it will be based on the actual capital structure, but capped at 60% equity.
- R Calculate using 13 month average balance, except ADIT which is calculated based on the prorated end of year balances as required by Section 1.167(l)-1(h)(6) of the IRS regulations for purposes of rate projections. An annual true-up is calculated based on an average of the actual beginning of the year and end of the year balances for non-plant related ADIT and prorated end of year balances for plant related ADIT.
- Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Utility must receive FERC authorization before recovering the cost of abandoned plant.
- Recovery of Regulatory Assets is permitted only for pre-commercial and formation expenses as authorized by the Commission. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.
- U Excludes Asset Retirement Obligation balances
- V Company shall be allowed recovery of costs related to interest rate locks. Absent a Section 205 filing, Company shall not include in the Formula Rate, the gains, losses, or costs related to other hedges.
- W The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference
- X Calculate using a simple average of beginning of year and end of year balances reconciling to FERC Form No. 1 by Page, Line and Column as shown in Column 2.

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
  Inclusive of any CWIP or unamentized abandoned plant included in rate base when authorized by FERC order less any perfunded AFUDC, if applicable.

  Project Gross Plant is the total capital increments for the project collabolar in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities.

  Gross plant does not include Unamentized Abandoned Plant

  Project New Plant in the Project Gross Plant and Includinged in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamentized Abandoned Plant and excludes any regulatory asset, which are to entered as a separate line item.

  Project New Plant is the Project Gross Plant and includinged in Column 3 less the associated Accumulated Depreciation Expense in Adandoned Plant and excludes any regulatory asset, which are to entered as a separate line item.

  Project New Plant is the Project Column 3 less than the Project Theory Schepic Includes any regulatory asset, which are to entered as a separate line item.

  Project New Plant in the Project Column 3 less than the Project Theory Schepic Includes any regulatory asset, which are to entered as a separate line item.

  Project New Plant in the Project Theory Schepic Includes any regulatory asset, which are to entered as a separate line item.

  Project New Plant in the Project Theory Schepic Includes any regulatory asset, which are to entered as a separate line item.

  Project New Plant in the Project Theory Schepic Includes any regulatory asset, which are to entered as a separate line item.

  Project New Plant in the Project Theory Schepic Includes any regulatory asset, which are to entered as a separate line item.

  Project New Plant in Column 3 less than the Plant of the Project Includes any regulatory asset, which are to entered to the project and the revers included in page 2 column 9.

  The Unamentized Abandoned Plant

#### Attachment 2 Incentive ROE GridLiance High Plains LLC

#### Notes:

- 1) From Attachment 1, line 15, col. 14 for the projection for the Rate Year.
- 2) From Attachment 1, line 15, col. 14 for that project based on the actual costs for the Rate Year.
- 3) The "Revenue Received" on line 2, Col. (E), is the total amount of revenue distributed to company in the year as shown on pages 328-330 of the Form No 1. The Revenue Received is input on line 2, Col. E excludes any True-Up revenues. Column E, lines 3 are the dollar amounts of Revenue Received reflecting the % in Column D. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Net Revenue Requirement in Column C.
- 4) Interest from Attachment 6.
- 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

#### Prior Period Adjustment

	(a)	(b)	(c)	(d)
	Prior Period Adjustment	Amount	Interest	Total
	(Note B)	In Dollars	Note B	Col. (b) + Col. (c)
5	-	-	-	=

Notes:

Α

В

For each project or Attachment H, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H and any Projects paid by SPP to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col. (G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).

Interest Income (Expense)

Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.

30		Reserve 4							
30									
30	Of .							-	_
3	1	Total		-				-	

#### Notes:

- A Recovery of regulatory asset is limited to any regulatory assets authorized by FERC.
- B Recovery of abandoned plant is limited to any abandoned plant recovery authorized by FERC.
- C Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance ineligible for inclusion in rate base; and (iii) a demonstration that AFUDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1.
- D For rate projections and the annual true-up, ADIT is computed using the prorated end of the year balances as required by Section 1.167(1)-1(h)(6) of the IRS regulations. Attachment 4a calculates the projected ADIT balances on line 28 above based on the prorated ending ADIT balances as calculated on Attachment 4b. For the annual true-up, Attachment 4e calculates the projected ADIT balances on line 28 above based on the prorated ending ADIT balances as calculated on Attachment 4f.
- E Recovery of a Regulatory Asset is permitted only for pre-commercial and formation expenses, and is subject to FERC approval before the amortization of the Regulatory Asset can be included in rates. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.
- F Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.
- G The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account. Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account.
- H Calculate using 13 month average balance, except ADIT which is calculated as described in Note D.

Instructions for Account 283:

- 1. ADIT items related only to Non-Electric Operations (e.g., Gas, Water, Sewer) or Production are directly assigned to Column C
- 2. ADIT items related only to Transmission are directly assigned to Column D
- 3. ADIT items related to Plant and not in Columns C & D are included in Column E
- 4. ADIT items related to labor and not in Columns C & D are included in Column F
- 5. Deferred income taxes arise when items are included in taxable income in different periods than they are included in rates, therefore if the item giving rise to the ADIT is not included in the formula, the associated ADIT amount shall be excluded. This includes but is not limited to SFAS 109 & 158 balance sheet items and the related ADIT.

Note 1 Uses a 365 day calendar year.

Note 2 Projected end of year ADIT must be based on solely on enacted tax law. No assumptions for future estimated changes in tax law may be forecasted.

A Substantial portion, if not all, of the ADIT-282 balance is subject to proration. Explanation must be provided for any portion of balance not subject to proration.

B Only amounts in ADIT-283 relating to Depreciation, if applicable, are subject to proration. See Line 44 in Attach 4c and 4d.

C Only amounts in ADIT-190 related to NOL carryforwards, if applicable, are subject to proration. See Line 18 in Attach 4c and 4d.

Note B
Interest is calculated by taking the interest rate in line 8 and applying it monthly to the balances in Column C-N (i.e., for January 12/12\* Column O, February 11/12\* Column O, etc.)
plus the interest rate in line 8 times 1.5 times the sum of the balances for January through December. Multiplying the monthly balances times the interest rate provides the interest in the year of the over or under collection and adding the interest rate in line 8 times 1.5 times the sum of the the balances for January through December provides the interest for the balance of the 24 month period

### Attachment 7 PBOPs GridLiance High Plains LLC

	Calculation of PBOP Expenses						
	(a)	(b)	(c)	(d)	(e)	(f)	(g)
1		SCMCN	Affiliate	Affiliate	Affiliate	Affiliate	Total
2	Total PBOP expenses (Note A)	-	-	-	-	-	-
3	Labor dollars (total labor from budget)	-	-	-	-	-	
4	Cost per labor dollar (line2 / line3)		-	-	-	_	
5	labor expensed (labor not capitalized) by SCMCN in current year, 354.28.b.	-	-	-	-	-	
6	PBOP Expense for current year	-	-	-	-	-	-
7	Lines 2-3 cannot change absent approval or acceptance by FERC in a separate proceeding.						
8	PBOP amount included in Company's O&M and A&G expenses included in FERC Account Nos. 500-935						-

Note Letter

There will be zero PBOP expenses in the SCMCN rates until SCMCN files for recovery of its PBOP expenses. Line 8 removes all SCMCN or affiliate BPOP expenses in FERC Accounts 500-935.

#### Attachment 8 Financing Costs for Long Term Debt using the Internal Rate of Return Methodology GridLiance High Plains LLC

To be utilized until a project is placed in service Consistent with GAAP, the Origination Fees and Commitments Fees will be amortized using the standard Internal Rate of Return formula below. Each year, the amounts withdrawn, the interest paid in the year, Origination Fees, Commitments Fees, and total loan amount will be updated on this attachment.

Table 1

- 1 The IRR is the input to Debt Cost shown on Attachment H, Page 4, Line 20 during the construction period, after obtaining project financing, in accordance with Note Q of Attachment H. 2. The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation is shown on line 6.

- The like is a discount rate that makes the fire present.

  N is the last quarter the loan would be outstanding t is each quarter

  Ct is the cash flow (Table 5, Col. I in each quarter)
- Ct is the cash flow (Table 5, Col. I in each quarter)
  Alternatively the equation can be written as 0 = C0 + C1/(1+IRR) + C2/(1+IRR)2 + C3/(1+IRR)3 + ... + Cn/(1+IRR)n and solved for IRR
  The Excel <sup>TM</sup> formula on line 2 is : (round(XIRR(first quarter of loan Col A of Table 5: last quarter of loan Col I of Table 5: last quarter of
- once the actual fees are known.
- once the actual rees are known.

  5. The estimate of the average 3 month Libor forward rate for the year on line 23 is that published by Bloomberg Finance L.P. during August of the prior year and is trued-up to actual average 3 month Libor rate for the year under the loan.

  6. Table 5, Col. C reflect the capital expenditures in each quarter
- 7. Table 5, Col. D reflect the amount of the loan that is drawn down in the quarter
- 9. Table 5, Col. E is the amount of principle drawn down

  9. Table 5, Col F calculates the interest on the principle drawn down to date based on the applicable interest on line 25

  10. Table 5, Col. G is the total origination fees in line 16 and is input in the first quarter that a portion of the loan in drawn
- 11. Table 5. Col. H is calculated as follows:
- 11. Table 5, Col. H is calculated as follows:

  A x (line 21, Col. (b)/4) + sum of line 17, Col. (c) through line 21x, Col. (c)

  Where A = Loan amount in line 1 less the amount drawn down (Table 5, Col. (E)) in the prior quarter

  12. The inputs shall be estimated based on the current market conditions and is subject to true up for all inputs, e.g., fees, interest rates, spread, and Table 3 once the
- 13. Prior to obtaining long term debt, the cost of debt, will be 1.99%. If SCMCN obtains project financing, the long term debt rate will be determined using the methodology in Attachment 8 and Attachment 8 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. Once SCMCN has long term debt, SCMCN will use its actual cost of long term debt determined in Attachment 5. The capital structure will be 60% equity and 40% debt during the construction period, after any asset is placed in service, it will be based on the actual capital structure.

16 Annual Totals

Note Letter

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
- Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable.
- C Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Gross plant does not include Unamortized Abandoned Plant.
- D Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes any regulatory asset, which are to entered as a separate line item.
- E Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 16. Project Depreciation Expense includes the amortization of Abandoned Plant
- F The Total General, Intangible and Common Depreciation Expense excludes any depreciation expense directly associated with a project and thereby included in page 2 column 9.
- G The Unamortized Abandoned Plant balance is included in Net Plant, and Amortization of Abandoned Plant is included in Depreciation/Amortization Expense.
- H The Use % is the customers NCP load divided by all of the NCP loads on the facilities
- If a portion of the projects revenue requirement is assessed to more than one customer, the project will be entered in a row for each customer seperately, such that the total of the revenue requirements for each customer equals the revenue requirement for that project.

- The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the accurated to the accruals to the accurated by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account.
- Calculate using 13 month average balance, except ADIT which is calculated based on the average of the beginning balance and a prorated end of year balance as required by Section 1.167(l)-1(h)(6)(ii) of the IRS regulations for purposes of rate projections. An annual true-up is calculated based on an average of the actual beginning of the year and end of the year balances.

#### Notes:

- 1) From Attachment 11, page 2, line 15, col. 11 and Attachment 11a, page 3, col. 11 for the projection for the Rate Year.
- 2) From Attachment 11, page 2, line 15, col. 11 and Attachment 11a, page 3, col. 11 for that project based on the actual costs for the Rate Year.
- 3) The "Revenue Received" on line 2, Col. (E), is the total amount of revenue distributed to company for Wholesale Distribution service. The Revenue Received is input on line 2, Col. E excludes any True-Up revenues.

  Column E, lines 3 are the dollar amounts of Revenue Received reflecting the % in Column D. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Net Revenue Requirement in Column 4) Interest from Attachment 6.
- 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

Notes: A

For each project or Attachment 11 or 11a, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment 11 and 11a and any Wholesale Distribution service paid by SPP to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col. (G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).

Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.

Hi David,

This is the allocation I used for the 2025 projection, which is

Allocation	Transmission	Dis
	15.4579572%	

Thank you,

Steven Shea, CPA | Associate Business Manager Mobile: (561) 772-7316 | Email: <a href="mailto:Steven.Shea@NextEra">Steven.Shea@NextEra</a>

- Note A As fled in the original application fled in docket EC21-10-000 on October 20, 2000, the transaction will be breaded as an asset six for fax purposes. ItS normalization rules will require the accumulated deferred income tax (PADT) balances of the Get/Linance Transocs to be reset to 50 upon closing. The resulting step up in rate base is expected to increase the combined revenue requirement of the Celditamics Transocs along the five-pare part deal their be transaction closes. To intigate this potentially advises rate effect. Celditamic Veloci tall provide fully the transaction at the holding company lovel, reflected as a reduction to the concent as allowance of each Gritfulance Transocs during the five-year period after closing.
- Note B Line 8, column (3), illustrates the ADIT balances prior to the close of the transaction. Line 8, column (4), expressins the elimination of the prior ADIT balances due to the "resel" of ADIT and reflects the estimated ADIT that vidi accumulate on the new rate base items from the date of closing of the transaction to the end of the year.
- Note C Line 22, column (3) illustrates the gross revenue requirement prior to the close of the transaction, utilizing AOIT balances of record. Line 22, column (8) illustrates the new gross revenue requirement due to the ADIT Trest.\*\* The increases or decrease in gross revenue requirement is then mitigated in Line 22, column (8) by a reduction or increase in the income tax Note D The columna of the variational registered in the 41 column (8) is branche to determine the columna of the variation of the amountain adjustment or the 41 column (8) is branche to determine which will be added to the columna of the variation of the amountain adjustment or the 41 column (8) is studied to level to properly mitigate the increase in gross revenue requirement from the ADIT Trest.\*

 $General\ Note:\ References\ to\ pages\ in\ this\ formulary\ rate\ are\ indicated\ as:\ (page\#,\ line\#,\ col.\#)$ 

	References to data from FERC Form	1 are	e indicat	ed as:	#.y.x	(page, line, colu	mn)

#### Note Letter

- The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income. Account 281 is not allocated. The calculations of ADIT in the annual true-up calculation will use the 13 month average balances for non-plant related items and the prorated end-of-year balances for plant related items. The calculation of ADIT in the annual Prue-Up calculations will be performed in accordance with IRS regulation Section 1.167(l)-1(h)(6). Work papers supporting with the ADIT calculations will be posted with each Annual True-Up for a given year will use the same methodology that was used to project that year's rates. The proration of the Annual True-Up shall apply beginning with the 2019 Annual True-Up.
- C Identified in Form 1 as being only transmission related.
- D Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 14, column 5 minus amortization of Regulatory Asset at page 3, line 11, column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported on pages 111, line 57 in the Form 1.
- E Page 3, Line 6 EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, and non-safety related advertising included in Account 930.1 found at 323.191.b. Page 3, Line 7-Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h.
- F Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.
- The currently effective income tax rate, where FIT is the weighted average Federal income tax rate; SIT is the weighted average State income tax rate, and p = "the percentage of federal income tax adductible for state income taxes." If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 26). Excess Deferred Income Taxes reduce income tax expense by the amount of the expense multiplied by (T/1-T).

Inputs Required:	FIT =	21.00%	(Federal Income Tax Rate)
	SIT=	5.92%	(Weighted Average State Income Tax Rate or Composite SIT)
	n =	0.00%	(nercent of federal income tax deductible for state nurnoses)

- H Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).
- Removes dollar amount of transmission plant to be included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- J Enter dollar amounts
- K ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC.
- L Page 4, Line 28 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1.
- M Includes income related only to transmission facilities, such as pole attachments, rentals and special use.
- N Company will not have any grandfathered agreements. Therefore, this line shall remain zero.
- The revenues credited on page 1 lines 2-6 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. Revenue Credits do not include revenues associated with FERC annual charges, gross receipts taxes, facilities not included in this template (e.g., direct assignment facilities and GSUs) the costs of which are not recovered under this Rate Formula Template.
- P Reserve
- Q Prior to obtaining long term debt, the cost of debt, will be 1.99%. If SCMCN obtains project financing, the long term debt rate will be determined using the methodology in Attachment 8 and Attachment 8 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. Once SCMCN has long term debt, SCMCN will use its actual cost of long term debt determined in Attachment 5. The capital structure but capital structure
- R Calculate using 13 month average balance, except ADIT which is calculated based on the prorated end of year balances as required by Section 1.167(l)-1(h)(6) of the IRS regulations for purposes of rate projections. An annual true-up is calculated based on an average of the actual beginning of the year and end of the year balances for non-plant related ADIT and prorated end of year balances for plant related ADIT.
- S Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Utility must receive FERC authorization before recovering the cost of abandoned plant.
- T Recovery of Regulatory Assets is permitted only for pre-commercial and formation expenses as authorized by the Commission. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.
- U Excludes Asset Retirement Obligation balances
- V Company shall be allowed recovery of costs related to interest rate locks. Absent a Section 205 filing, Company shall not include in the Formula Rate, the gains, losses, or costs related to other hedges.
- W The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference
- X Calculate using a simple average of beginning of year and end of year balances reconciling to FERC Form No. 1 by Page, Line and Column as shown in Column 2.

16 Annual Totals

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
  Inclusive of any CWIP or unamortized abundanced plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable.
  Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities.
- Froject Colors rain is the Onds Capinal investication to the project accumulate in the same memoria as the gives plant wante in min 1. This value includes a sunsequent capinal investigation to the control of the Color of the C

- True-Up Adjustment is calculated on the Project True-up Schedule for the Rate Year
  The Net Rev Req is the value to be used in the SPP's rate calculation under the applicable Schedule under the SPP OATT for each project.

- The Total General, Intangible and Common Depreciation Expense excludes any depreciation expense directly societated with a project and thereby included in page 2 column 9.

  The Unamortized Abandoned Plant balance is included in Net Plant, and Amortization of Abandoned Plant is included in Depreciation/Amortization Expense.

  The discount is the reduction in revenue, if any, that the company agreed to, for instance, to be selected to build facilities as the result of a competitive process and equals the amount by which the annual revenue requirement is reduced from the ceiling rate Requires approval by FERC of incentive return applicable to the specified project(s)

- recumes approval oy reas, of incentive return approaches to me specime projects).

  All facilities other than those being recovered under Schedules 7.8, 9 are to be included in Attachment 1.

  Facilities that provide Wholesale Distribution Service are not to be listed as projects on lines 15, the revenue requirements associated with these facilities are calculated on Attachment 11

  When an updated projected net revenue requirement is posted due to an asset acquisition as provided for in the Protocols, the difference between the updated net revenue requirement in Col (16) and the revenues collected to date will be recovered over the remaining months of the Rate Year.

# Attachment 2 Incentive ROE GridLiance High Plains LLC

23	Return (Attach. H, page 3	line 46 col 5)							(288,610.21)
	Income Tax (Attach. H, pa								1,450,034.92
		thout 100 basis point increase in ROE							1,161,424.70
26	Incremental Return and Inco	me Taxes for 100 basis point increase in l	ROE						288,610.21
	Rate Base (line 1)								(3,018,318)
28	Incremental Return and Inco	me Taxes for 100 basis point increase in l	ROE divided by Rate Base						(0.0956)

## Notes:

A Line 5 includes a 100 basis point increase in ROE that is used only to determine the increase in return and income taxes associated with a 100 basis point increase in ROE. Any actual ROE incentive must be approved by the Commission.

For example, if the Commission were to grant a 137 basis point ROE incentive, the increase in return and taxes for a 100 basis point increase in ROE would be multiplied by 1.37 on Attachment 1 column 12.

В	The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference

0.01

Monthly Interest Rate

Interest Income (Expense)

Notes:

1) From Attachment 1, line 15, col. 14 for the projection for the Rate Year.

- 2) From Attachment 1, line 15, col. 14 for that project based on the actual costs for the Rate Year.
- 3) The "Revenue Received" on line 2, Col. (E), is the total amount of revenue distributed to company in the year as shown on pages 328-330 of the Form No 1. The Revenue Received is input on line 2, Col. E excludes any True-Up revenues. Column E, lines 3 are the dollar amounts of Revenue Received reflecting the % in Column D. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Net Revenue Requirement in Column C.
- 4) Interest from Attachment 6.
- 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

#### Prior Period Adjustment

	(a)	(b)	(c)	(d)
	Prior Period Adjustment	Amount	Interest	Total
-	(Note B)	In Dollars	Note B	Col. (b) + Col. (c)
5	-	-	-	-

Notes:

A For each project or Attachment H, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H and any Projects paid by SPP to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col. (G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).

B Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected

Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.

30		Reserve 3							
30		Reserve 4							
30									
30	f							-	_
31		Total		=				-	

#### Notes:

- A Recovery of regulatory asset is limited to any regulatory assets authorized by FERC.
- B Recovery of abandoned plant is limited to any abandoned plant recovery authorized by FERC.
- C Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance ineligible for inclusion in rate base; and (iii) a demonstration that AFUDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1.
- D For rate projections and the annual true-up, ADIT is computed using the prorated end of the year balances as required by Section 1.167(1)-1(h)(6) of the IRS regulations. Attachment 4a calculates the projected ADIT balances on line 28 above based on the prorated ending ADIT balances as calculated on Attachment 4b. For the annual true-up, Attachment 4c calculates the projected ADIT balances on line 28 above based on the prorated ending ADIT balances as calculated on Attachment 4f.
- E Recovery of a Regulatory Asset is permitted only for pre-commercial and formation expenses, and is subject to FERC approval before the amortization of the Regulatory Asset can be included in rates. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.
- F Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.
- G The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account.
- H Calculate using 13 month average balance, except ADIT which is calculated as described in Note D.

# Attachment 4a - Accumulated Deferred Income Taxes (ADIT) Average Worksheet (Projection)

Note 1 Uses a 365 day calendar year.

Note 2
Projected end of year ADIT must be based on solely on enacted tax law. No assumptions for future estimated changes in tax law may be forecasted.

A Substantial portion, if not all, of the ADIT-282 balance is subject to proration. Explanation must be provided for any portion of balance not subject to proration.

B Only amounts in ADIT-283 relating to Depreciation, if applicable, are subject to proration. See Line 44 in Attach 4c and 4d.

C Only amounts in ADIT-190 related to NOL carryforwards, if applicable, are subject to proration. See Line 18 in Attach 4c and 4d.

# Attachment 4c - Accumulated Deferred Income Taxes (ADIT) Worksheet (Beginning of Year) For the 12 Months Ended 12/31/2023 GridLiance High Plains LLC

	0.01 0.01	

## Note B

Interest is calculated by taking the interest rate in line 8 and applying it monthly to the balances in Column C-N (i.e., for January 12/12\* Column O, February 11/12\* Column O, etc.) plus the interest rate in line 8 times 1.5 times the sum of the balances for January through December. Multiplying the monthly balances times the interest rate provides the interest in the year of the over or under collection and adding the interest rate in line 8 times 1.5 times the sum of the balances for January through December provides the interest for the balance of the 24 month period

3	Labor dollars (total labor from budget)	-	-	-	-	-	
4	Cost per labor dollar (line2 / line3)		-	-	-	-	
5	labor expensed (labor not capitalized) by SCMCN in current year, 354.28.b.	-	-	-	-	-	
6	PBOP Expense for current year	-	-	-	-	-	-
7	Lines 2-3 cannot change absent approval or acceptance by FERC in a separate proceeding.						
8	PBOP amount included in Company's O&M and A&G expenses included in FERC Account Nos. 500-935						-

Note Letter

There will be zero PBOP expenses in the SCMCN rates until SCMCN files for recovery of its PBOP expenses. Line 8 removes all SCMCN or affiliate BPOP expenses in FERC Accounts 500-935.

## Attachment 8 Financing Costs for Long Term Debt using the Internal Rate of Return Methodology GridLiance High Plains LLC

To be utilized until a project is placed in service

Consistent with GAAP, the Origination Fees and Commitments Fees will be amortized using the standard Internal Rate of Return formula below. Each year, the amounts withdrawn, the interest paid in the year, Origination Fees, Commitments Fees, and total loan amount will be updated on this attachment.

Table 1

Table 3

			-	-		-	
			-	-		-	
			-	-		-	

## Notes

- 1 The IRR is the input to Debt Cost shown on Attachment H, Page 4, Line 20 during the construction period, after obtaining project financing, in accordance with Note Q of Attachment H.
- 2. The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation is shown on line 6.

N is the last quarter the loan would be outstanding

t is each quarter

Ct is the cash flow (Table 5, Col. I in each quarter)

Alternatively the equation can be written as 0 = C0 + C1/(1+IRR) + C2/(1+IRR)2 + C3/(1+IRR)3 + ... + Cn/(1+IRR)n and solved for IRR

The Excel TM formula on line 2 is: (round(XIRR(first quarter of loan Col A of Table 5; last quarter of loan Col I of Table 5; last quarter of loan Col I of Table 5; last quarter of loan Col I of Table 5, 8%),4)
The 8% in the above formula is a seed number to ensure the formula produces a positive number.

- 3. Line 1 reflects the loan amount, the maximum amount that can be drawn on
- 4. Lines 11-21a include the fees associated with the loan. They are estimated based on current bank condition and are updated with the actual fees once the actual fees are known.

- 5. The estimate of the average 3 month Libor forward rate for the year on line 23 is that published by Bloomberg Finance L.P. during August of the prior year and is trued-up to actual average 3 month Libor rate for the year under the loan.
- 6. Table 5, Col. C reflect the capital expenditures in each quarter
- 7. Table 5, Col. D reflect the amount of the loan that is drawn down in the quarter
- 8. Table 5, Col. E is the amount of principle drawn down
- 9. Table 5, Col F calculates the interest on the principle drawn down to date based on the applicable interest on line 25
- 10. Table 5, Col. G is the total origination fees in line 16 and is input in the first quarter that a portion of the loan in drawn
- 11. Table 5, Col. H is calculated as follows:

A x (line 21, Col. (b)/4) + sum of line 17, Col. (c) through line 21x, Col. (c)

Where A = Loan amount in line 1 less the amount drawn down (Table 5, Col. (E)) in the prior quarter

- 12. The inputs shall be estimated based on the current market conditions and is subject to true up for all inputs, e.g., fees, interest rates, spread, and Table 3 once the amounts are known
- 13. Prior to obtaining long term debt, the cost of debt, will be 1.99%. If SCMCN obtains project financing, the long term debt rate will be determined using the methodology in Attachment 8 and Attachment 8 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. Once SCMCN has long term debt, SCMCN will use its actual cost of long term debt determined in Attachment 5. The capital structure will be 60% equity and 40% debt during the construction period, after any asset is placed in service, it will be based on the actual capital structure.

## Note 1:

Electric Intangible Franchises and Transmission Land Rights are amortized over the life of the franchise agreement or land right.

## Note 2:

South Central's depreciation and amortization rates may not be changed absent a section 205 or 206 filing

### Attachment 11 Wholesale Distribution Service GridLiance High Plains LLC

To be completed in conjunction with Attachment H.

Pages 1-2 are to be filed out if the facilities providing Wholesale Distribution Service are booked to transmission. If the facilities are booked to Distribution, see pages 3-6

The Wholesale Distribution Revenue Requirement is projected using either pages 1-2 or 4-6. The same pages are populated with actual data and the difference with interest is calculated on Attachment 12 Notes A-H refer to the notes at the bottom of page 2 of 6 of this Attachment

16 Annual Totals

Note Letter

- Gross Transmission Plant is that identified on page 2 line 2 of Attachment H
- B Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable.
- C Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Gross plant does not include Unamortized Abandoned Plant.
- D Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes any regulatory asset, which are to entered as a separate line item.
- E Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 16. Project Depreciation Expense includes the amortization of Abandoned Plant
- F The Total General, Intangible and Common Depreciation Expense excludes any depreciation expense directly associated with a project and thereby included in page 2 column 9.
- G The Unamortized Abandoned Plant balance is included in Net Plant, and Amortization of Abandoned Plant is included in Depreciation/Amortization Expense.
- H The Use % is the customers NCP load divided by all of the NCP loads on the facilities
- I fa portion of the projects revenue requirement is assessed to more than one customer, the project will be entered in a row for each customer separately, such that the total of the revenue requirements for each customer equals the revenue requirement for that project.

35c Reserve 3	
····	-

- A The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account.
- B Calculate using 13 month average balance, except ADIT which is calculated based on the average of the beginning balance and a prorated end of year balance as required by Section 1.167(I)-1(h)(6)(ii) of the IRS regulations for purposes of rate projections. An annual true-up is calculated based on an average of the actual beginning of the year and end of the year balances.

## Notes:

- $1)\ From\ Attachment\ 11,\ page\ 2,\ line\ 15,\ col.\ 11\ and\ Attachment\ 11a,\ page\ 3,\ col.\ 11\ for\ the\ projection\ for\ the\ Rate\ Year.$
- 2) From Attachment 11, page 2, line 15, col. 11 and Attachment 11a, page 3, col. 11 for that project based on the actual costs for the Rate Year.
- 3) The "Revenue Received" on line 2, Col. (E), is the total amount of revenue distributed to company for Wholesale Distribution service. The Revenue Received is input on line 2, Col. E excludes any True-Up revenues.

Column E, lines 3 are the dollar amounts of Revenue Received reflecting the % in Column D. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Net Revenue Requirement in Column D.

- 4) Interest from Attachment 6.
- 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific.

## **Prior Period Adjustment**

5

(a)	(b)	(c)	(d)
Prior Period Adjustment	Amount	Interest	Total
(Note B)	In Dollars	Note B	Col. (b) + Col. (c)
	-	-	-

Notes: A

В

For each project or Attachment 11 or 11a, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment 11 and 11a and any Wholesale Distribution service paid by SPP to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col. (G) and (H). Col. (J) is the sum of Col. (G), (H), and (I).

Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect.
